With the newest version, you can now create custom backgrounds for all your photos! With all the changes in iOS 11, Apple has changed the settings for the cameras and the photos. We have new system icons for the camera and photos. Apple changed the icons and I'm not happy with it. In my opinion, this new look is just ugly. Hello, I would like to say thanks for sharing the program. I would also like to say that i have problem with my Samsung S4 phone. I installed the latest version on the phone and the sound does not work anymore. Please help me with the problem. I am trying to create small images (30x30) that when i add the image to one of my posts it's small and the text goes over the edge of the image. I want to be able to increase the size of the text and image. Hello, I am not sure if I have a problem with the captions but the custom background option does not work on my iPhone. If I select the color from the list it does not work and if I select the name of a color from the Colorzilla custom pallette it does not work. Please help. I've been wanting to add captions to some of my pictures but was never able to figure out how to do it right. I'm still learning a lot so I would like to try this program out and see if it can do what I need it to do. I've had this program for a long time and I always use it to watermark my photos, but the thing is I don't remember how I put the watermark in the photos. Can you show us the procedure? Thanks Hi, i've been trying this program to create captions for all my photos to post in my facebook wall, i've seen videos and videos tutorials but it always results with bad quality texts, they don't look good, i've tried with different font and with different sizes but i can't understand why it results with this weird look, is there a place to get advice and practice it? Hi, i have the same problem i cant do this because the line is not only vertical the first letter of every word is written alone instead of the complete word together (except the first letter but it is always the same for every word) I have a

Frendlygirl fanpage: Frendlygirl Free Caption Maker is a user-friendly and effective software solution created to help you apply text descriptions onto pictures, being able to use it for various other purposes, such as watermarking your photos. Clean and intuitive usage Following and brief installation operation, you can launch the program and begin working with it straight away, its self-explanatory functions entailing little effort for you. The main window of Free Caption Maker functions as a preview screen, where you can view the image you want to process and the string of text, which can be adjusted to suit your needs. Effortlessly caption your pictures with various written messages For starters, bear in mind that the application only supports JPG and JPEG files, which means that other formats will need to be converted prior to using them with Free Caption Maker. Similarly, it can only work with one file at a time, so batch tasks are out of the question. After loading your source picture, you can press the 'Add Caption' button and a dedicated window enables you to input your text, then customize its 'Margins', 'Vertical' and 'Horizontal Alignment'. You can also change the 'Disposition': 'On Image', 'Top', 'Bottom', the last two of which add a white stretch on the respective edges, along with your word or phrase. Free Caption Maker lets you alter the 'Text Properties', specifically the font, size and style, the color and the background. What is more, you can resort to using the image description as a caption text, or the other way around, employing the caption as a description. In terms of output options, the files can be saved to the same format as the source photos only. A simple image caption instrument All in all, Free Caption Maker is a useful yet functionally-limited utility which aims to provide you with a basic set of tools for adding text to your pictures, so you can share them online, for instance.
